## Prologue –

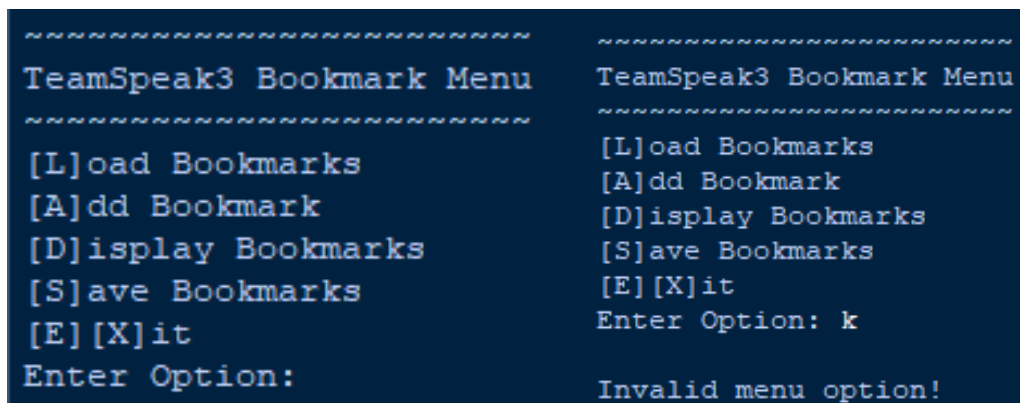

This application is called TeamSpeak3 Bookmarks it is used to store bookmarks of your favourite servers on the TeamSpeak3 client. It stores the server's name, your nickname, the server address and password if required and also a specific channel and password if required. The bookmarks program is a highly used function in TeamSpeak3 and is ideally depended upon for clients that use TeamSpeak3 on a daily to weekly or even monthly basis. The ideal part of this application is that when you want to connect to your bookmarked server you can quickly click on it, and it will connect you to the server and dedicated channel if chosen.

Here is a link to the original TeamSpeak3 program.

## Menu –

Here is an example of what the Teamspeak3 Bookmark Menu looks like. The options that are valid to be used in this menu are the ones that have [] around them. For example, to add bookmarks you would use option “a” then press enter. If you choose an invalid option, you will get the displayed message as indicated with “k” in the below image. This menu will continue to show throughout finishing functions until the program is closed.

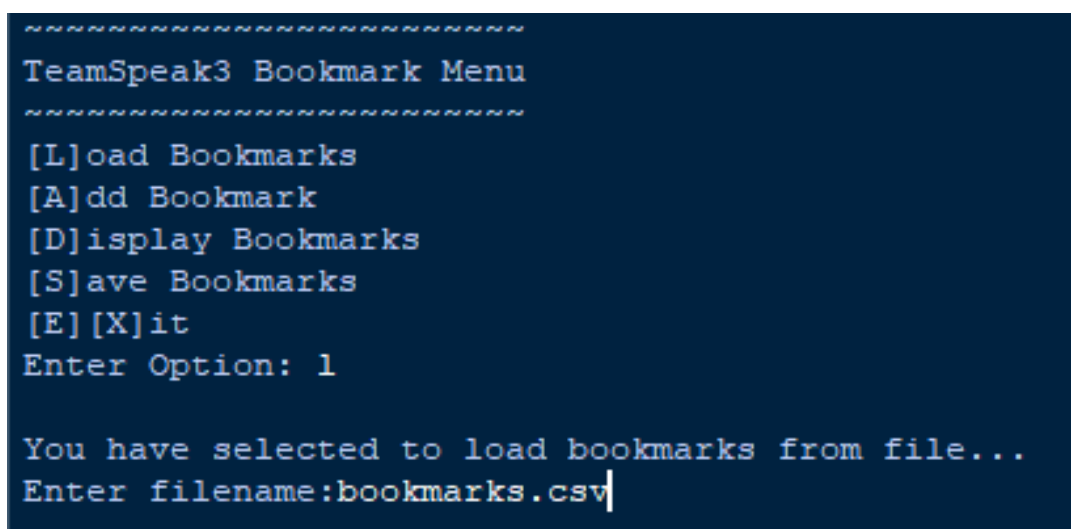

```
~~~~~
TeamSpeak3 Bookmark Menu
~~~~~
[L]oad Bookmarks
[A]dd Bookmark
[D]isplay Bookmarks
[S]ave Bookmarks
[E][X]it
Enter Option:

~~~~~
TeamSpeak3 Bookmark Menu
~~~~~
[L]oad Bookmarks
[A]dd Bookmark
[D]isplay Bookmarks
[S]ave Bookmarks
[E][X]it
Enter Option: k
Invalid menu option!
```

## Load Bookmarks –

Here is an example of what you should do when trying to load a file that already contains bookmarks stored. When loading a file, you need to make sure that you type the correct filename and the type of file it is. The two supported types of documents for this program are CSV and txt. In the sample screenshot below this is a correct example of how it should be done.

```
~~~~~
TeamSpeak3 Bookmark Menu
~~~~~
[L]oad Bookmarks
[A]dd Bookmark
[D]isplay Bookmarks
[S]ave Bookmarks
[E][X]it
Enter Option: l

You have selected to load bookmarks from file...
Enter filename:bookmarks.csv|
```

## Add Bookmark –

When adding a bookmark use option “a” from the menu by typing it and pressing enter. You will be asked to input information in the next 7 entries. If you do not need to add any information to certain questions you may just press enter. If you somehow press space with no information before pressing enter it will ask you to enter the information again. The bookmark number must be in digit form and cannot be below 0, if you do not enter this correctly you will be asked to try again. An example of how it can be done is indicated in the image below.

```
TeamSpeak3 Bookmark Menu
[Load Bookmarks
[Add Bookmark
[Display Bookmarks
[Save Bookmarks
[Exit]
Enter Option: a

You have selected to add a bookmark...
Enter bookmark name: ash's teamspeak
Enter nickname: Ash
Enter server address: ash.teamspeak3.com
Enter bookmark password (if required): Password
Enter bookmark default channel (if required): Ash's Channel
Enter bookmark default channel password (if required): Password
Enter bookmark number: 1

Adding bookmark...

Your bookmark has successfully been added!
```

## Display Bookmarks –

When you would like to display the saved information of what you have inputted to the program or loaded into the program, please use option “d”. When you type it and press enter the information will appear in a table as indicated in the image below (please note that that the columns do not line up so you will need to keep that in mind).

```
TeamSpeak3 Bookmark Menu
[Load Bookmarks
[Add Bookmark
[Display Bookmarks
[Save Bookmarks
[Exit]
Enter Option: d

Displaying bookmarks...

Name      Nickname      Address Password      Channel Password      Number
Nice Hat M8      Ash      nhm.teamspeak3.com      Password      Ash's Channel      Password      1
Ash's Teamspeak Ash      ash.teamspeak3.com      Password      Ash's House      Password      2
```

## Save Bookmarks –

When you would like to save the bookmarks to a file, please use the option “s” by typing it and pressing enter. This will then ask you to enter a filename for the bookmarks. Use CSV or txt after the filename and this will save it in the correct form. Here is an example of the correct way to do this.

```
~~~~~  
TeamSpeak3 Bookmark Menu  
~~~~~  
[L]oad Bookmarks  
[A]dd Bookmark  
[D]isplay Bookmarks  
[S]ave Bookmarks  
[E][X]it  
Enter Option: s  
  
You have selected to save bookmarks to a file...  
Enter filename: bookmarks.csv
```

## Exiting Program -

When you would like to exit and close the program, please use either of these options on the main menu. The options being “e” or “x”, will then close the program as indicated in the images below.

~~~~~ TeamSpeak3 Bookmark Menu ~~~~~ [L]oad Bookmarks [A]dd Bookmark [D]isplay Bookmarks [S]ave Bookmarks [E][X]it Enter Option: x Program closing...  T	~~~~~ TeamSpeak3 Bookmark Menu ~~~~~ [L]oad Bookmarks [A]dd Bookmark [D]isplay Bookmarks [S]ave Bookmarks [E][X]it Enter Option: e Program closing...  T
