## Prologue –

This application is called TeamSpeak3 Bookmarks it is used to store bookmarks of your favourite servers on the TeamSpeak3 client. It stores the server's name, your nickname, the server address, and password if required and also a specific channel and password if required. The bookmarks program is a highly used function in TeamSpeak3 and is ideally depended upon for clients that use TeamSpeak3 on a daily to weekly or even monthly basis. The ideal part of this application is that when you want to connect to your bookmarked server you can quickly click on it, and it will connect you to the server and dedicated channel if chosen.

Here is a link to the original TeamSpeak3 program.

<https://play.google.com/store/apps/details?id=com.teamspeak.ts3client>

**Program Entry –** Here is an example of how to enter the bookmarks menu. You must use a code to be able to access the bookmarks menu. The code can only be bypassed by entering digits. If something else is entered other than digits, it will ask you to enter the correct input.

```
=====
LOADING PROGRAM.....
=====

=====
WELCOME TO TEAMSPEAK3!
=====

Please enter your TeamSpeak security code to continue..
Enter code: 1234
```

The program automatically searches for a file called “data.csv” when ran. If there is not a file named “data.csv” in the folder where this program is installed, it will create a file and you will be asked to restart the program as shown below.

```
FileNotFoundException: File not found. A bookmark data.csv file has been created. Please restart the program.
```

## Menu –

Here is an example of what the Teamspeak3 Bookmark Menu looks like. The options that are valid to be used in this menu are the ones that have [] around them. For example, to add bookmarks you would use option “a” then press enter. If you choose an invalid option, you will get a message displayed back to you stating that it is an invalid menu option. This menu will continue to show throughout finishing functions until the program is closed. The program reads the information from a file called “data.csv” and display back if there are any bookmarks stored or not.

```
=====
LOADING BOOKMARK MENU.
=====

2 bookmarks loaded from file...

TeamSpeak3 Bookmark Menu
~~~~~
[A]dd Bookmark
[R]emove a Bookmark
[D]isplay Bookmarks
[S]ave Bookmarks
[E][X]it
Enter Option: |
```

## Add Bookmark –

When adding a bookmark use option “a” from the menu by typing it and pressing enter. You will be asked to input information in the next 7 entries. If you do not need to add any information to certain questions you may just press enter. If you somehow press space with no information before pressing enter it will ask you to enter the information again. A bookmark number must be added, if nothing is input it will ask you again to input a number. An example of how it can be done is indicated in the image below.

```
~~~~~
TeamSpeak3 Bookmark Menu
~~~~~
[A]dd Bookmark
[R]emove a Bookmark
[D]isplay Bookmarks
[S]ave Bookmarks
[E][X]it
Enter Option: a

You have selected to add a bookmark...
Enter bookmark name: Ash's Teampseak
Enter nickname for Ash's Teampseak: Ash
Enter server address for Ash's Teampseak: ash.teamspeak3.com
Enter bookmark password (if required) for Ash's Teampseak: Password
Enter bookmark default channel (if required) for Ash's Teampseak: Ash's Channel
Enter bookmark default channel password (if required) for Ash's Teampseak: Password
Enter bookmark number: 3

Adding bookmark...

Your bookmark has successfully been added!
```

## Remove Bookmark –

When removing a bookmark, you will be required to enter the information that has been stored and match is correctly. If you correctly enter the information the bookmark will be deleted from the file, if the information is entered incorrectly you will need to try again.

```
~~~~~
TeamSpeak3 Bookmark Menu
~~~~~
[A]dd Bookmark
[R]emove a Bookmark
[D]isplay Bookmarks
[S]ave Bookmarks
[E][X]it
Enter Option: r

Removing bookmark...
Enter bookmark name: Nice Hat M8
Enter nickname: Ash
Enter server address: nhm.teampseak3.com
Enter bookmark password (if required): Password
Enter bookmark default channel (if required): Ash's Channel
Enter bookmark default channel password (if required): Password
Enter bookmark Number: 1
Bookmark has been found and removed if entry was correct...
```

## Display Bookmarks –

When you would like to display the saved information of what you have inputted to the program or loaded into the program, please use option “d”. When you type it and press enter the information will appear in a table as indicated in the image below. Each stored data type is separated by a “,”.

```
~~~~~
TeamSpeak3 Bookmark Menu
~~~~~
[A]dd Bookmark
[R]emove a Bookmark
[D]isplay Bookmarks
[S]ave Bookmarks
[E][X]it
Enter Option: d

Displaying bookmarks...

Name, Nickname, Address, Password, Channel, Password, Number
Ash's House,Ash,mycrib@teamspeak3.com,CoolGuy123,Crib Hang,Noodles 54,1
Gemma's Crib,Gem Gem,coffecrib@teamspeak3.com,HotCoffee,Cafe,Cafel,2
```

## Save Bookmarks –

When you would like to save the bookmarks to a file, please use the option “s” by typing it and pressing enter. This menu option will automatically save the information stored to the filename “data.csv”. This file must not be altered anywhere outside of the program, doing so will cause errors in future.

```
~~~~~
TeamSpeak3 Bookmark Menu
~~~~~
[A]dd Bookmark
[R]emove a Bookmark
[D]isplay Bookmarks
[S]ave Bookmarks
[E][X]it
Enter Option: s

You have selected to save bookmarks....
You have successfully saved bookmarks to data.csv
```

## Exiting Program -

When you would like to exit and close the program, please use either of these options on the main menu. The options being “e” or “x”, will then close the program as indicated in the image below.

```
~~~~~
